About the College

Dr. D. Y. Patil Law College was established in the year 2001 under the patronage of Dr. P. D. Patil, Chairman. The objective of this Law College right from its inception has been to promote and protect the feeling of togetherness, caring, sharing and understanding between students from all states. Sincere efforts are being made to achieve excellence in academics including practical training, excellence infrastructure and excellence in discipline. .

About the Programme

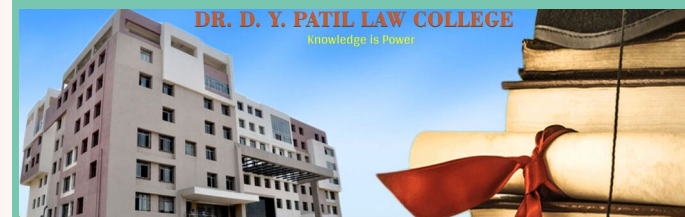

"Technology is a queer thing.
It brings you great gifts with one hand,
and it stabs you in the back with other"
– Carrie P. Snow

We are all aware of the changing face of life of man from primitive man to Z- generation. Man started his journey from search of livelihood to the world of technology. With the advancement of technology, new methods of crime are coming to the fore. As society relies increasingly on computers, the amount of crime perpetrated with the machines has risen in kind. The journey of technology has not been stopped here it added a new chapter that is Right to Privacy and Legal Regime of Data Protection laws in India. The right to privacy is a multidimensional concept. In modern society right to privacy has been recognized both in the eye of the law and in common parlance. The right to privacy refers to the specific right of an individual to control the collection, use and disclosure of personal information. This growth in the use of personal data has many benefits but it could also lead to problems. Further, the convergence of technologies has spawned a different set of issues concerning privacy rights and data protection. Innovative technologies make personal data easily accessible and communicable. This Advanced Training Programme has been framed in a way through which it will become effortless to understand the Information Technology Act, 2000 in detail, Right to Privacy and Data protection issues in Indian perspective and ongoing multidimensional development in this area.
